

DOUGLAS CARDINAL ARCHITECT

November 2010,

To Whom It May Concern:

Our office has just recently completed our first project with Maloney Contractors; *Driver House* for the Dawson Creek Native Housing Society. We have been working with Maloney for the better part of a year and have found that their work and representation on this project has been friendly, enthusiastic and most of all professional.

This project, which also required LEED Silver certification, demanded clear communication and reaction time in order to maintain the tight budget and schedule – while still providing the necessary service to satisfy the administrative needs of BC Housing; the funder. Their project manager and site superintendant consistently contributed in ways of finding feasible alternatives whenever budgets became an issue while still maintaining our firm's design intent.

Maloney Contractors are skilled and cooperative and I would have no hesitation in working with them again on another important project.

If you require any additional information, please do not hesitate to call me at your convenience.

Sincerely,

Roberto Campos - Project Manager
